

Natural wet slab Blackmore

Mt Blackmore
Northern Gallatin
3/23/2019
Code
WS-N-R1-D1.5-G
Elevation
7400
Aspect
W
Latitude
45.46630
Longitude
-110.98400
Notes

Skiers in Hyalite saw a natural wet [slab](#) near Blackmore Lake. From the email: "The [slide](#) was located around 300 yards South of Blackmore Lake on a West facing slope at an elevation just above 7400 feet. It broke below a cliff band about 3' deep (to the ground) and ran a few hundred feet (almost to the skin [track](#))." Photo: JR Mooney
