Natural near Cooke

Wolverine Peak Cooke City 1/16/2020 Code N-R2-D2-O Elevation 9700

Aspect

SE

Latitude

45.05300

Longitude

-110.01000

Notes

"A south and southeast aspect of Mt. Wolverine around 9,500'-10,000'. I'd estimate the lower crown to be about 3' deep. And timing of the event maybe around Jan. 16.?" Photo: B. Fredlund
