Intentional cornice drop triggered a soft slab, Republic Mtn

Mt Republic Cooke City 1/6/2021 Code SS-NCc Aspect N Latitude 45.00170 Longitude -109.95500 Notes

"We headed up Republic with the intention of skiing one of the north couloirs but decided against it once we reached the top. We still managed to drop a fairly large <u>cornice</u> down one of them, triggering a soft <u>slab</u> that ran a ways into the apron below but didn't step down to anything deeper. While side hilling on the solar side of the East ridge on the way back down towards our skin <u>track</u> we felt a very substantial wumph."
