Activity

Snowboarding

Saw the most recent post on instagram of not finding surface hoar near Mt. Blackmore. I toured up a ridgeline that divides Lewis Creek and Hyalite Creek in paradise valley. I saw surface hoar the entire way up the ridge on all aspects. I believe it formed the night of 9th. I thought I should let you know that there was some surface hoar not to far away as the crow flies.

Region

Northern Gallatin

Observer Name

Elton
