

# Hyalite, Upper Green Sleeves

Date

Sat, 02/20/2021 - 12:57

Activity

Ice Climbing

Stable snowpack between hangover and upper green sleeves (ugs) while hiking. As soon as we crossed into the wind loaded gully we experienced increasingly slabby snow structure with failure. No snow pits or stability tests

Region

Northern Gallatin

Location (from list)

Hyalite - main fork

Observer Name

Clay Kincer
