

Submarine - Woody Ridge

Date

Wed, 01/26/2022 - 14:00

Activity

Skiing

Toured out Woody today with hopes of skiing Submarine. We backed off when we found plenty of dense wind affected snow on the aspect we desired. Some minor cracking around obvious rollers was noted.

I dug a pit lower down in the saddle in a less wind affected area. No results on an CT or ECT and try as I might I could not find any buried surface hoar. Skiing in the trees was great!

Region

Cooke City

Location (from list)

Woody Ridge

Observer Name

Nick Roe
