

Natural Avalanche, Mount Bole Basin

Mt. Bole
Northern Gallatin
2/24/2023
Code
N-R3-D3
Elevation
10000
Aspect
E
Latitude
45.41600
Longitude
-110.99800
Notes

From IG. "I spotted a large crown this morning on the E face of Bole. The crown appeared to be pretty deep, at least a few feet, and propagated quite wide. It also looked like there was a debris path coming down the apron of the E face of Hyalite peak, but I was too far away to know for sure."
