

Collapses up Cabin Creek

Date

Sat, 02/03/2024 - 16:55

Activity

Skiing

Snowmobiling

Went snowmobiling/skiing below White Peak. We saw older crowns down low in the meadows. While skinning up a mellow south facing nose off white peak, we dug down and got a ECTP15 2.5 feet below the surface. About 8-10 inches of snow fell throughout the day up high. As we continued to skin up higher, we observed numerous collapses before we decided to call it a day. We observed that aspects without a crust layer from this week were more reactive, although we saw propagation on solar aspects with a defined crust as well.

Region

Southern Madison

Location (from list)

Cabin Creek
