

Cabin Creek Whumpfs

Date

Sun, 03/03/2024 - 11:15

Activity

Snowboarding

We were skiing out of the Cabin Creek cabin over the weekend, mostly in the low angle terrain around Skyline Ridge. Throughout the storm on Saturday and after the clouds cleared on Sunday we experienced consistent whumpfing while breaking trail. Some were larger and some were smaller, usually triggered by the person breaking trail but some of the larger ones were triggered by the second or third skier in the track.

Region

Southern Madison

Location (from list)

Cabin Creek

Observer Name

Zach Cohen
