Notes

From obs on 03/07: "observed several crowns on Republic from Town Hill, likely from 03/06. Ray's had a [slide](#) on its west end which appeared to be isolated from the large avalanche that was filmed on the shoulder/Ray's. We saw up to 4 other crowns in Republic bowl on NE, N, and NW aspects including one that broke on the NE facing spines looker's left of the Fin that got legs and ran into the trees out of site (R1-D2?)."
