Touchy wind slab on Bridger Ridge

Date
Tue, 04/22/2025 - 16:05
Activity
Skiing

NE facing ridgeline near Hidden Couloir was touchy, with a 6-8” stiff wind slab breaking quite easily underfoot. Not the first person to ski Hidden, so observed this slab was not propagating far, but was breaking easily as temps heated up.

Region
Bridger Range
Location (from list)
Bridger Bowl
Observer Name
M. Standal
