

Plentiful snow on the west side of the Bridger Range was being transported to the East side. Fresh wind slabs were forming near ridgetops. As these wind slabs were forming they were starting to crack under my ski tips. With additional loading overnight these wind slabs should become much more sensitive. Photo: GNFAAC

Advisory Region  
Bridger Range  
Longitude  
-110.96W

Latitude  
45.88N
